DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Murrow (U.S. Patent No. 6,165,147) in view of Castel et al. (U.S. Patent No. 6,068,606). Murrow discloses an iliac crest belt adapted for interlocking attachment to a body brace having a back element shaped to fit a person's lower back region (Murrow, Fig. 1). Thus, Murrow discloses the claimed invention with the exception of fastening means, attached to the center of the elongated strip for removably fastening the belt assembly to the first back element so as to impart stabilizing force from the elongated strip through the fastening means to the back

element. However, Castel, which also relates to a back brace, teaches that it is known to include a removable belt 85 (Castel, col. 6, lines 2-22) within a back brace. Thus, it would have been obvious to one skilled in the art to incorporate the removable belt 85 of Castel within the back brace of Murrow for the purpose of compressing or restricting movement of the tissue around the waist of the wearer so as to provide greater stability to the wearer's spine (Castel, col. 6, lines 31-34).
